### DETAILED ACTION

1. This office action is in response to the Amendment filed 04/27/2010. Claims 1-38 are now pending.

#### *Examiner's Amendment*

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Andrew M. Lawrence on July 17, 2010.

3. The application has been amended as follows:

**Cancel claim 18, 30-31, and 34-35 without prejudice;**

Amending the following claims:

Claim 22, line 14, change "fragment;" to --fragment, said mixture further comprising at least one of an emissive dopant and a charge transporting dopant;--;

Claim 25, line 15, change "fragment;" to --fragment, said mixture further comprising at least one of an emissive dopant and a charge transporting dopant;--;

Claim 36, line 13, change "fragment;" to --fragment, said mixture further

comprising at least one of an emissive dopant and a charge transporting dopant;--;

***Allowable Subject Matter***

4. Claims 1-17, 19-29, 32-33, and 36-38 are allowed.

5. The following is an examiner's statement of reasons for allowance:

The present claims are allowable over the closest references: Tanamura et al.  
(JP 10-144469).

Summary of Claim 1:

A composition comprising <b>a mixture of</b>	
	at least one monomer with the formula: $A-(X)_n$ (1)
	at least one monomer with the formula: $B-(Y)_m$ (2)
where monomers of formula (1) are polymerisable with monomers of formula (2)	
n & m	integers greater than or equal to 2 such that n and m may be the same or different
X	a group containing a <b>terminal thiol</b>
Y	a group containing a reactive <b>unsaturated carbon-carbon bond</b>
	each X may be the same or different, each Y may be the same or different
A & B	molecular fragments such that <b>at least one of A or B is an organic charge-transporting or organic light-emitting fragment</b>
<u>the mixture further comprising at least one of an emissive dopant and a charge transporting dopant</u>	

Tanamura et al. disclose a **composition comprising an organic luminescent layer and a substrate** for the organic electroluminescence device, the composition comprising a monomer containing polyfunctional acrylate in the formula of

and a monomer containing polymercapto group in the formula of

wherein R = SH (claims 1-3; [0013], [0035]-[0040]). Tanamura et al. further disclose that the photopolymerization is carried out in the presence of an ultraviolet ray absorbent which reads on the initiator ([0045]). However, Tanamura et al. do not teach

or fairly suggest the claimed composition, wherein the composition comprises, in particular, at least one of an emissive dopant and a charge transporting dopant.

In light of the above discussion, it is evident as to why the present claims are patentable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
